Education

VNUHCM - University of Science — Ho Chi Minh City
Bachelor's of Information Technology, Computer Networks and Telecommunications Specialization — *Aug 2022 — Present*

- GPA: 8.0/10.0
- **Relevant Coursework**: Data Structures and Algorithms, Object-oriented programming, Databases, Operating Systems, Computer Network, Intro to Software Engineering, Intro to Artificial Intelligence, DevOps Fundamentals, Computer Network Programming, Computer Security, Database Security.

Le Hong Phong High School For The Gifted — Ho Chi Minh City
Specialized in Chemistry — *Aug 2019 — Jul 2022*

- GPA: 9.0/10 | Academic Scholarship for Excellent Performance.

Work Experience

Information Technology Intern — Sep 2025 — Feb 2026
Robusta Technology & Training — *Ho Chi Minh City*

- Deployed, configured, and tested containerized learning management systems (Frappe LMS) and hands-on IT training lab environments on Linux and Docker infrastructure.
- Contributed to developing the cross-platform client (Flutter for Web, Android, iOS) of RobustCert, an IT certification examination platform.

Projects

End-to-End CI/CD Pipeline with GitOps for Microservices ,

- Built an automated CI/CD pipeline for an 8-service Spring Boot monorepo using Jenkins, testing and building only modified microservices and integrating shift-left security scanning (SonarQube SAST, OWASP Dependency-Check, Trivy) before publishing Docker images.
- Automated multi-environment Kubernetes deployments (`dev`, `staging`, and on-demand sandbox environments) using reusable Helm charts and pull-based GitOps with ArgoCD for continuous state reconciliation and self-healing.
- Tech stack: Jenkins, Docker, Kubernetes, Helm, ArgoCD.
- Github: https://github.com/pTn-3001/petclinic-devops.git

Lab-as-a-Service Platform (youtu.be/U2W9UBZ9fuo),

- Built an on-premise cloud training platform in an Nx Monorepo comprising 3 Next.js portals (Student, Instructor, Admin) and 6 NestJS microservices (API Gateway, Auth, User, Lab, Orchestration, Grading) with isolated per-service PostgreSQL databases on an OpenStack private cloud.
- Automated the end-to-end virtual lab lifecycle, including dynamic VM and network provisioning, VXLAN multi-tenant session isolation, automated resource reclamation upon expiration, and a custom VM image diffing and approval workflow.
- Integrated browser-based terminal access via WebSocket proxy alongside real-time automated checkpoint grading from guest VMs.
- Tech stack: Next.js, NestJS, PostgreSQL, Prisma ORM, OpenStack, Docker.
- Github: https://github.com/pTn-3001/Lab-as-a-Service.git

Kumon Center Management System (kumon.ptn2026.id.vn),

- Developed and deployed a production management platform actively used by Kumon Gia Hoa Center, enforcing 4-role RBAC (Admin, Teacher, Assistant, Consultant) to digitize daily educational and administrative operations.
- Automated the complete student lifecycle including CRM lead pipelines, consulting appointments, trial-to-official enrollment conversions (Math/EFL), shift-based class and make-up scheduling, attendance tracking, assessment records, worksheet inventory, and automated DOCX-to-PDF certificate generation.
- Built financial and HR modules for tuition/expense tracking, full-time/part-time staff payroll and timekeeping, and monthly KPI analytics dashboards; containerized with Docker Compose and exposed securely via Cloudflare Tunnel.
- Tech stack: Next.js, TypeScript, PostgreSQL, Prisma ORM, Docker Compose, Cloudflare Tunnel, Tailwind CSS.
- Github: https://github.com/pTn-3001/Kumon-Center-Management.git

Asterisk VoIP PBX & Advanced IVR System (https://youtu.be/trUYVGyFeLY),

- Designed and implemented a VoIP PBX system built with Asterisk, featuring SIP/IAX2 trunking, custom dialplan routing, automated IVR call navigation, voicemail services, and time-based call management.
- Tech stack: Asterisk, VoIP, Zoiper, VMWare.
- Github: https://github.com/pTn-3001/Asterisk-VoIP.git

Skills

- **Programming & Scripting**: Bash (Shell), Python, TypeScript, SQL

- **Libraries/Frameworks**: React, Next.js, Tailwind CSS, Nest.js
- **Tools**: Github, Git, MongoDB, PostgreSQL, Jenkins, Docker, Kubernetes, ArgoCD
